Election/Restrictions

1. Claims 1-11 and 31-35 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 6.
2. Applicant's election without traverse of claims 12-30 in Paper No. 6 is acknowledged.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 12-13, 15-16, 18-19, 21-22, 28-26, 28-29 are rejected under 35 U.S.C. 102(e) as being anticipated by Youden et al (US Patent 6,340,820).

Youden discloses a light detection method and device having a transparent and opaque region for detecting IR radiation comprising (Column 3, lines 46-51):

forming a substantially transparent IR detection medium (element 240);

Application/Control Number: 09/834,727

Art Unit: 2878

forming a substantially opaque IR detection medium (element 235, Column 5, lines 58-59);

mounting the substantially transparent and opaque IR detection medium on a substrate

(See Figure 2);

wherein the substrate includes a laser safety warning information. (see Figure 2B).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 14, 17, 20, 24, 27, 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Youden (US Patent 6,340,820).

Youden does disclose mounting the detector onto a substrate (Column 3, lines 11-12) but does not specifically disclose that the substrate is made of cardboard. It would have been obvious to

Application/Control Number: 09/834,727

Art Unit: 2878

one having ordinary skill in the art at the time the invention was made to use a cardboard substrate, since it has been held to be within the general skill of a working in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 227 F.2d 197, 125 USPQ 416 (CCPA 1960).

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. US Patent 5,361,767- this reference discloses a method and apparatus of detecting a beam using a detector card, but does not use a dual detector with a transparent and opaque component.
